

Brown University

Campus Wide Fiber Backbone

Owner Reference:

Brown University
115 Waterman Avenue
Providence, RI 02906
Ed Milner
Oke Lundin

Technology Consultant:

Edi Ltd. Consulting Engineers
Jim Harrison
150 Interstate North Parkway
Atlanta, GA 30339-2102

Features / Achievements:

- Full Corning EWP End to End Solutions
- Over 9500 Fiber Terminations
- Aerial & Duct Outside Plant Installation
- Ten plus miles of Fiber Installed
- Ranged from 6 strand to 144 strands to 32 various buildings

About the Client

Brown University was founded in 1764 and is the seventh – oldest college in the United States. Brown is an independent, coeducational Ivy League installation comprising of undergraduate and graduate programs; as well as; the Alpert Medical School, School of Engineering, and Executive Master of Healthcare.

Scope of Work

SyNet's first project with Brown University was to install a fiber and copper backbone throughout the Brown University Campus.

This project included cabling to forty-three campus buildings – located on the Eastside of Providence. As buildings were brought back online to Brown's Wide Area Network, it was imperative for SyNet to maintain a tight time line, and to adhere to and abide by seamless project coordination.
