About the Client

Roger Williams University is a leading independent, coeducational university with programs in the liberal arts and the professions, where students become community- and globally-minded citizens through project-based, experiential learning.

Scope of Work

The new academic building project in particular, adopted a get it done attitude. Various low voltage technologies were brought together under our contract. We were involved in access control and surveillance; as well as, data and voice cabling. Furthermore SyNet also coordinated with the RWU media department in order to properly address and meet all of their audio / visual needs.
