

Westerly High School

Westerly, Rhode Island

Owner Reference:

Westerly High School
23 Ward Avenue
Westerly, RI 02891

Construction Manager:

Gilbane Construction Co.
7 Jackson Walkway
Providence, RI 02903

Features / Achievements:

- Structured Cabling
- Voice and Data Systems
- Wireless Access Points
- Security Cameras
- Audio Visual Communications
- Distance Learning Equipment

Scope of Work

The Westerly School Department continues to be firmly committed towards providing a safe environment for faculty and students alike. The School Department was able to secure a grant, during this renovation, which allowed for an expansion of the initial cabling infrastructure project. The grant permitted SyNet to also provide and establish access control points -- complete with CCTV integration, video distribution and video surveillance -- which today allows the school to monitor and regulate movement, and prevent unauthorized entry into the buildings.

About the Client

The Westerly High School recently underwent a major renovation project on their campus facility. SyNet, Inc. provided the materials, labor and project management expertise to allow for the installation of structured cabling systems, bell alarm systems, audio-visual communications and distance learning equipment.
